

Fluence Expands U.S. Domestic Supply Chain with Houston-based HVAC and Chiller Production

August 21, 2025

Partnership with Bergstrom bolsters domestic manufacturing and energy security while strengthening Fluence's leadership position in building a U.S. supply chain for battery energy storage

ARLINGTON, Va., Aug. 21, 2025 (GLOBE NEWSWIRE) -- [Fluence Energy, Inc.](#) ("Fluence") (NASDAQ: FLNC), a global market leader delivering intelligent energy storage systems, services, and asset optimization software, today announced the start of production at a new manufacturing facility in Houston, Texas. The facility produces thermal management systems, including HVAC and chiller equipment, for Fluence's Gridstack Pro™ battery energy storage solutions. This manufacturing facility and partnership with Bergstrom represent another milestone in Fluence's commitment to building a robust network of U.S.-based manufacturing for the growing battery storage market.

Fluence's diversified supply chain and U.S.-based production continues to provide customers with reliable storage systems that help reduce exposure to changing trade dynamics. The Houston facility plays a crucial role in the company's strategy to onshore production of every major product and component of a grid-scale battery energy storage system to the United States.

"There's broad recognition of the enormous value batteries bring to the electricity grid—to address increased power demand, maintain reliability, and lower costs," said John Zahurancik, President, Fluence Americas. "With this Houston facility and our broader network of U.S. manufacturing plants, U.S.-made battery energy storage is playing a growing role in domestic power production and energy security."

Fluence currently leverages five manufacturing facilities in collaboration with manufacturing partners across the U.S. that produce everything from battery cells and modules to inverters, enclosures, and controls equipment. These manufacturing partnerships represent more than 1,200 manufacturing jobs in calendar year 2025 alone.

"We are extremely excited to support an industry leader like Fluence in their efforts to expand secure energy production in the United States. Bergstrom has been manufacturing battery-based mobile HVAC solutions for over 20 years," said Dan Giovannetti, President and CEO of Bergstrom. "The partnership with Fluence leverages the strengths of both companies and allows Bergstrom to supply a reliable, high-performance, domestically manufactured thermal management system to the Fluence's Gridstack Pro product line."

Fluence's expanded use of domestic manufacturing capabilities comes at a time of increased focus on energy security and U.S. supply chain resilience. The company's products play a critical role in grid stability and power sector modernization, with energy storage projects contributing to grid reliability for millions of Americans across major ISO power markets.

"Every supply chain decision we make is grounded in our commitment to deliver reliable, high-performing solutions for customers across dynamic market conditions," said Peter Williams, Chief Product and Supply Chain Officer, Fluence. "This expansion helps accelerate our progress toward increasing U.S.-based production and strengthening a resilient supply chain, and we believe it positions us to maximize domestic content in the solutions we deliver."

With more than 22,000 MWh of battery energy storage capacity deployed or contracted across 90+ projects in the U.S., Fluence is supporting leading U.S. utilities, power producers, and developers with cutting-edge storage solutions that enable a more reliable and cost-effective grid.

About Fluence

Fluence Energy, Inc. (Nasdaq: FLNC) is a global market leader delivering intelligent energy storage and optimization software for renewables and storage. The Company's solutions and operational services are helping to create a more resilient grid and unlock the full potential of renewable portfolios. With gigawatts of projects successfully contracted, deployed, and under management across nearly 50 markets, the Company is transforming the way we power our world for a more sustainable future.

Cautionary Statement Regarding Forward-Looking Statements

The statements contained in this press release that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements regarding the anticipated production performance of the Houston facility, expected impact of this production on U.S. energy storage market and Fluence operations specifically, anticipated impact on Fluence's ability to produce domestic content energy storage solutions, and other beliefs, assumptions, prospects, plans, and objectives of management. Such statements can be identified by the fact that they do not relate strictly to historical or current facts. When used in this press release, words such as "may," "possible," "will," "should," "expects," "plans," "anticipates," "could," "intends," "targets," "projects," "contemplates," "commits," "believes," "estimates," "predicts," "potential," or "continue," or the negative of these terms or other similar expressions and variations thereof and similar words and expressions are intended to identify such forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

The forward-looking statements contained in this press release are based on our current expectations and beliefs concerning future developments, as well as a number of assumptions concerning future events, and their potential effects on our business. These forward-looking statements are not guarantees of performance, and there can be no assurance that future developments affecting our business will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, which include, but

are not limited to, changes to the regulatory environment in the United States and unforeseen circumstances outside of Fluence's control which may cause production at the Houston facility to not perform as anticipated, and such factors set forth under Item 1A."Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended September 30, 2024, filed with the Securities and Exchange Commission ("SEC") on November 29, 2024, and in other filings we make with the SEC from time to time. New risks and uncertainties emerge from time to time and it is not possible for us to predict all such risk factors, nor can we assess the effect of all such risk factors on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Should one or more of these risks or uncertainties materialize, or should any of the assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. You are cautioned not to place undue reliance on any forward-looking statements made in this press release. Each forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements to reflect events or circumstances that occur, or which we become aware of, after the date hereof, except as otherwise may be required by law.
