Fluence Named a Leading Global Battery Energy Storage Provider in S&P Global Commodity Insights Report

December 11, 2025

Fluence among top three providers worldwide based on installed and contracted capacity

ARLINGTON, Va., Dec. 11, 2025 (GLOBE NEWSWIRE) -- Fluence Energy, Inc. (“Fluence”) (NASDAQ: FLNC), a global market leader delivering intelligent energy storage systems, services, and asset optimization software, has been recognized as one of the top three battery energy storage system providers worldwide in the newly released S&P Global Commodity Insights 2025 Battery Energy Storage System Integrator Report. The independent assessment measures companies based on installed and contracted energy storage capacity.

According to the report, Fluence ranks in the top three for installed and contracted BESS capacity, both including and excluding China, signaling another year of strong growth and consistent execution across major markets. It also highlights the company’s leadership in the United States, where Fluence holds the second-largest total capacity, bolstered by its domestic-content strategy and robust contracted pipeline. In Europe, Fluence continues to scale its footprint in both the UK and continental markets, including Germany, where the company stands as the second-largest provider for both installed and contracted capacity. Together with top-tier positions in Australia and across the rest of the Americas, these results underscore Fluence’s role as one of the few providers with a truly global, multi-regional footprint.

“From Europe and the United States to Australia and emerging markets, our teams are executing solutions for some of the most complex storage projects on the planet. As shown in this independent analysis, Fluence is repeatedly trusted by lenders and asset owners to deliver these large, grid-critical projects,” said Julian Nebreda, President and Chief Executive Officer, Fluence. “This report displays Fluence in the top tier of global storage system providers and sends a clear signal to customers, lenders, and regulators that our technology, execution, and service platform is designed for long-term reliability and risk reduction.”

Fluence’s recognition comes amid rapid global growth in large-scale energy storage deployments as grids integrate higher levels of renewable energy, prepare for the expansion of AI data centers, and respond to rising expectations around energy security and resilience. To meet these evolving needs, Fluence continues to invest in standardized storage platforms, advanced cyber-safe controls and optimization software, and regionalized supply chains. These investments help customers deploy storage faster, operate fleets more efficiently, and comply with emerging regulatory and security requirements.

The company’s momentum has also been acknowledged across the broader industry. At the 2025 Energy Storage News Awards held last month, Fluence earned System Integrator of the Year for the third consecutive year and Product of the Year for Smartstack™, its most advanced storage solution launched earlier this year, along with additional honors recognizing the company and its customers.

The 2025 Battery Energy Storage System Integrator Report is available through S&P Global Commodity Insights Clean Energy Technology.

About Fluence
Fluence Energy, Inc. (Nasdaq: FLNC) is a global market leader delivering intelligent energy storage and optimization software for renewables and storage. The Company's solutions and operational services are helping to create a more resilient grid and unlock the full potential of renewable portfolios. With gigawatts of projects successfully contracted, deployed, and under management across nearly 50 markets, the Company is transforming the way we power our world for a more sustainable future.

Cautionary Statement Regarding Forward-Looking Statements
The statements described herein that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements regarding execution, pipeline, market position, and statements regarding beliefs, assumptions, prospects, plans, and objectives of management. Such statements can be identified by the fact that they do not relate strictly to historical or current facts. When used in this press release, words such as "may," "possible," "will," "should," "expects," "plans," "anticipates," "could," "intends," "targets," "projects," "contemplates," "commits", "believes," "estimates," "predicts," "potential," or "continue," or the negative of these terms or other similar expressions and variations thereof and similar words and expressions are intended to identify such forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

The forward-looking statements contained in this press release are based on our current expectations and beliefs concerning future developments, as well as a number of assumptions concerning future events, and their potential effects on our business. These forward-looking statements are not guarantees of performance, and there can be no assurance that future developments affecting our business will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, which include, but are not limited to, growth trends in energy storage deployments as grids integrate higher levels of renewable energy, expansion of data centers to serve artificial intelligence requirements, and rising expectations around energy security and resilience, and other factors set forth under Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended September 30, 2025, filed with the Securities and Exchange Commission (“SEC”) on November 25, 2025, and in other filings we make with the SEC from time to time. New risks and uncertainties emerge from time to time and it is not possible for us to predict all such risk factors, nor can we assess the effect of all such risk factors on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Should one or more of these risks or uncertainties materialize, or should any of the assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. You are cautioned not to place undue reliance on any forward-looking statements made in this press release. Each forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements to reflect events or circumstances that occur, or which we become aware of, after the date hereof, except as otherwise may be required by law.
