

## Fluence Announces Customer-Focused Training Platform for Energy Storage Systems

June 14, 2022

### Fluence Academy online training program designed to advance industry knowledge of energy storage operations

ARLINGTON, Va., June 14, 2022 (GLOBE NEWSWIRE) -- Fluence Energy, Inc. ("Fluence") (Nasdaq: FLNC), a leading global provider of energy storage products and services and digital applications for renewables and storage, today announced its new online training platform for Fluence energy storage systems: Fluence Academy. Fluence Academy is designed to increase the knowledge and skillsets of Fluence customers to help them effectively and efficiently manage energy storage systems.

Fluence Academy is a self-paced online training program with over thirty courses that cover topics including system safety, preventative maintenance, reactive maintenance, and Fluence OS controls software. Fluence Academy offers training packages tailored to different user types and includes two levels of advanced maintenance certifications. The training program aims to enhance customers' ability to maintain optimal performance of their battery-based energy storage systems over the lifetime of the assets.

As a fast-growing industry with GW of new assets coming online each year, the energy storage landscape is rapidly evolving. This growth creates challenges and opportunities for storage project developers, owners, and operators. The Fluence Academy on-demand learning platform is intended to provide storage system owners and operators with a deep understanding of how to manage, maintain, and operate battery energy storage systems and help advance industry knowledge around energy storage.

"For over a decade, Fluence Services team members have partnered with our customers to ensure successful energy storage operations and efficient maintenance. We're excited to launch Fluence Academy to provide self-service access to knowledge and resources necessary to assist them in managing and operating their own systems," says Jeff Gibbons, VP, Global Service at Fluence. "As energy storage technology continues to evolve and more assets come online, our goal is to support access to high quality training and the continued growth of knowledge in the industry."

Fluence Academy is currently available to Fluence customers. Additional training programs for broader audiences are a priority for the future. Learn more at <https://info.fluenceenergy.com/fluence-academy-learning-platform>.

### About Fluence

Fluence Energy, Inc. (Nasdaq: FLNC) is a global market leader in energy storage products and services, and digital applications for renewables and storage. With a presence in 30 global markets, Fluence provides an ecosystem of offerings to drive the clean energy transition, including modular, scalable energy storage products, comprehensive service offerings, and the Fluence IQ Platform, which delivers AI-enabled digital applications for managing and optimizing renewables and storage from any provider. Fluence is transforming the way we power our world by helping customers create more resilient and sustainable electric grids. ### Forward-Looking Statement

The information in this press release includes "forward-looking statements" within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of present or historical fact included in this press release are forward-looking statements, including, without limitation, the anticipated benefit and additional knowledge that Fluence training platform may provide to Fluence customers and its role in the clean energy transition.

The forward-looking statements contained in this press release are based on our current expectations and beliefs concerning future developments, as well as a number of assumptions concerning future events, and their potential effects on our business. These forward-looking statements are not guarantees of performance, and there can be no assurance that future developments affecting our business will be those that we have anticipated. These forward-looking statements involve significant risks and uncertainties that could cause the actual results to differ materially from the expected results. Most of these factors are outside Fluence's control and are difficult to predict. Factors that may cause such differences in expected results include but are not limited to the following: actual use of the training platform by clients in practice, the ability of the training platform to adequately answer Fluence customers questions and assist them in the maintenance and operation of their energy storage systems in real time, and the training platform's ability to run and operate without any defects or errors. Fluence cautions that the foregoing list of factors is not exclusive. Additional information about factors that could materially affect Fluence is set forth under the "Risk Factors" section in its Annual Report on Form 10-K and Quarterly Reports on Form 10-Q filed with the Securities and Exchange Commission, and available on the SEC's website at [www.sec.gov](http://www.sec.gov).

Except as otherwise required by applicable law, Fluence disclaims any duty to update any forward-looking statements contained in this press release, all of which are expressly qualified by the statements in this section, to reflect events or circumstances after the date of this press release. Should underlying assumptions prove incorrect, actual results and projections could differentiate materially from those expressed in any forward-looking statements.
