

## Origin Selects Fluence to Deliver the 300 MW / 650 MWh Mortlake Power Station Battery in Australia

January 29, 2024

MELBOURNE, Australia, Jan. 29, 2024 (GLOBE NEWSWIRE) -- Fluence Energy, Inc. ("Fluence") (NASDAQ: FLNC), a leading global provider of energy storage products, services, and optimisation software for renewables and storage, today announced that the company has been selected by Origin Energy Limited (Origin) to deliver a 300 MW / 650 MWh battery at the Mortlake Power Station in southwest Victoria.

The project will use Fluence's [Gridstack](#)™ energy storage product with a 15-year service agreement contributing to Origin's strategy to accelerate renewable energy and energy storage in its portfolio. The system will also utilise Fluence's AI-powered asset performance management (APM) software, [Nispera](#)™, to optimise the battery's operational performance.

"We are honored to be selected by Origin to deliver this grid-forming battery-based energy storage system and deploy our ecosystem of solutions," said Fluence President and Chief Executive Officer Julian Nebreda. "Australia is an important market for Fluence. Our local team is now delivering over 1 GW energy storage projects within Australia to enhance grid stability and enable the country's clean energy transition."

The site preparation and civil works of the Mortlake Battery are expected to commence following a period of detailed design and procurement activity. The energy storage system is anticipated to be commissioned in late 2026.

Located in Victoria's South West Renewable Energy Zone, this energy storage system will provide system strength to the grid. The system will capture excess power during periods of high renewable generation and discharge to meet peak demand.

### About Fluence

Fluence Energy, Inc. (Nasdaq: FLNC) is a global market leader in energy storage products and services, and optimization software for renewables and storage. With a presence in 47 markets globally, Fluence provides an ecosystem of offerings to drive the clean energy transition, including modular, scalable energy storage products, comprehensive service offerings, and the Fluence IQ Platform, which delivers AI-enabled digital applications for managing and optimizing renewables and storage from any provider. The company is transforming the way we power our world by helping customers create more resilient and sustainable electric grids.

### Forward-Looking Statements

The statements described herein that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements regarding the operational performance of the Mortlake Battery project, expected timeline of the Mortlake Battery project, anticipated performance of Nispera, the anticipated contribution of the project on the grid and more generally, on the energy transition in Victoria and Australia. Such statements can be identified by the fact that they do not relate strictly to historical or current facts. When used in this press release, words such as "may," "possible," "will," "should," "expects," "plans," "anticipates," "could," "intends," "targets," "projects," "contemplates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of these terms or other similar expressions and variations thereof and similar words and expressions are intended to identify such forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking.

The forward-looking statements contained in this press release are based on our current expectations and beliefs concerning future developments, as well as a number of assumptions concerning future events, and their potential effects on our business. These forward-looking statements are not guarantees of performance, and there can be no assurance that future developments affecting our business will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond our control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements, which include, but are not limited to, impacts to the Mortlake Battery project from geopolitical instability, extreme weather, and/or changes in Victoria and/or Australia's regulatory regime and energy goals relating to renewables and energy storage, failure to achieve the anticipated benefits and operational performance from the Mortlake Battery project, and other factors set forth under Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended September 30, 2023, filed with the Securities and Exchange Commission ("SEC") on November 29, 2023, and in other filings we make with the SEC from time to time. New risks and uncertainties emerge from time to time and it is not possible for us to predict all such risk factors, nor can we assess the effect of all such risk factors on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Should one or more of these risks or uncertainties materialize, or should any of the assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. You are cautioned not to place undue reliance on any forward-looking statements made in this press release. Each forward-looking statement speaks only as of the date of the particular statement, and we undertake no obligation to publicly update or revise any forward-looking statements to reflect events or circumstances that occur, or which we become aware of, after the date hereof, except as otherwise may be required by law.
